Digital media is a key component in film, television, video and website production, and encompasses a variety of disciplines including filming, editing, digital animation and graphic design. The constant implementation of new technology makes this a fast-moving field a good fit for the student who seeks a career in a visual medium with leading-edge technology. Instruction includes production and editing software and the opportunity to gain practical experience working on a variety of studio projects. Employment opportunities for digital media professionals include work as creative services editors, video editors and graphics editors for production studios, and companies involved with film, web design, advertising and multimedia. The program also provides opportunities to upgrade skills for persons previously or currently employed in the industry.
